

CDI

Casting Designs, Inc. is a manufacturer of Glass Fiber Reinforced Gypsum material. We produce our material in and ship from Fort Worth, Texas.

Though we are not a part of the Leed's Program, we provide this information which may be useful.

Casting Designs, Inc. purchases it's fiberglass from Georgia Pacific. Georgia Pacific's plant is in Blue Rapids, KS. Alpha Gypsum is a product that is mined from the ground. It contains 0% recycled post consumer product.

Casting Designs, Inc. Glass Fiber Reinforced Gypsum has 6% to 8% fiberglass content by weight. Our gypsum material weighs 2lbs per foot. The balance of our material is gypsum and water.

Superior Fiberglass is located in Kentucky. Our fiberglass is made from 80% post consumer recycled products. They recycle light bulbs to make the fiberglass with.

Conner Industry is where we purchase the wood that our crates are made from. There is 0% post consumer recycled products in this material also. Conner Industry is not FSC Certified. There is no added urea formaldehyde in their wood.

If further information is required, please do not hesitate to call Gooding & Associates at 631-749-3313 or Casting Designs directly at 817-551-7373.

Sincerely,

Casting Designs Inc
